

Full Automatic Fish Filleting Machine

Fish filleting machine

This fish fillet machine can process fresh fish and half thawed fish, within 120mm height, and 70mm thickness.

It can reduce labor costs since it can process 40-50 fishes per minutes.

It keep the best freshness on material as this machine can process a large quantity of fish in a short time.

The skill fish fillet machine, can process very consistent quality of products and also has very good efficiency to quality control.

It opens the abdomen of the fish body (and remove the central bone at the same time).

Features:

- *Stainless steel materials made, whole body washable.
- *High automatically, safe and reliable, stable performance.
- *Can be customized according to customer demand size.

Technical parameter:

Model	KP715
Fish weight	0.1-2kg
Fish height	≅ 120mm
Fish thickness	≅ 70mm
Power	1.1kw/380v
Overall dimension	1500x700x1400mm
Capacity	40-50pcs/min

Fish Head Cutting Machine

It transfers raw fish into the tray, according to the size of set straight cutting head.

Main features:

- * Cutting size is easy to adjust, cutting with high efficiency.
- * According to the V shape cutting, reduce the loss of the fish.
- * Suitable for fish: Mackerel, Spanish mackerel, multi-line fish, walleye pollack, all.

Technical parameter:

Model: SYT100

Materials: 304SUS

Voltage: 380V/3P

Power: 1.1KW

Capacity: 60pcs/min

Dimension: 1500X650X1200mm LxWxH

Weight: 130KG

Fish skin peeling machine

It can remove the skin of many kinds of fish, salmon, squid, tilapia, catfish, cod, plaice, etc.

Main features:

- *High efficiency: one machine can cost 30-50 people working capacity, and the equipment cost can be recovered in a short time;
- *Good effect: good peeling effect, clean and neat peeling.
- *High yield rate: higher yield rate than manual peeling.
- *Easy to clean: The equipment is all made of stainless steel, with humanized design, easy to disassemble and wash.

Technical parameter:

Model: BP435

Material: 304 stainless steel

Power: 0.75KW

Voltage: 380V3P

Output: 15~30 pcs/min

Dimension: 650L* 520W *800H mm

Weight: 55KG

Fish scaling machine

The scales of the fish are removed by water pressure, and the fish body is less damaged. Depending on the fish, the speed can be adjusted. The pressure can be adjusted, and it can also be used for cleaning. Suitable for processing a variety of fresh fish and thawed fish, such as: salmon, trout, sea bream, flounder, sea crucian, Antarctic ice fish, perch, mandarin fish, tilapia, balang fish, etc.

Technical parameter:

Capacity: 40-60pcs/min

Power: 7kw/380v

Weight: 390kg

Dimension: 1880*1080*2000mm

Fish Feed Pellet Making machine

Brief Introduction :

1. The Fish Feed Pellet Making Machine has the function of heating and puffing, is mainly used for feed fish.
2. The machine can produce different particle shapes, and we will offer 6 mould for free, you can choose the shape you like.
3. Raw materials like soybean meal, rapeseed, rice bran, fish meal, bone meal, corn meal, flour and so on, so the feed pellet processed by the machine has rich nutrition.
4. This machine is very popular in the country of Peru, Ghana, Belgium, Niger, Angola, Malaysia etc.
5. We have a lot of Models according to its capacity, you can choose one as your need,
